

HYDROSMART™

By SMART ENERGY.

Chemical free water solutions for the home, pool & garden

HYDROSMART *the new and innovative technology that offers effective, affordable and chemical free solutions to the problems caused by the minerals and chemicals present in our water supplies.*

HYDROSMART uses resonance frequencies to neutralize the bonding ability of the minerals present in the flow. This prevents the large mineral crystals from building and scale formation ceases. These frequencies remain active in water for up to 5 days and progressively remove any scale that has already formed in the pipes and appliances connected to the flow. This not only prolongs the life of your appliances but significantly reduces energy, plumbing and repair bills.

Stains and water marks are all associated with scaling and any tiled, glass or stainless steel surfaces, in regular contact with the treated water, regain their original appearance and need less cleaning.

HYDROSMART changes large crystals into tiny particles, providing you with softer water and all its benefits, including better lathering of soaps and shampoos, exceptional washing and rinsing results. Hair and clothing feel noticeably softer, cutlery, crockery and glassware sparkle.

Research has established that the tiny particles produced by Hydrosmart treatment are too small for algae or mould to form on. This has led to a wide range of health benefits. Shower mould disappears along with the scale and the airborne spores that can trigger some asthma attacks. There is a significant improvement in fungal related skin conditions such as dandruff and athletes foot.

You achieve all this without using chemicals, so the environment wins too.

Removes Algae & Shower Mould

Prolongs the life of Appliances and Hot Water Systems

Thriving Gardens and Lawns

Removes Algae from Swimming Pools and Garden Ponds

Sparkling Cutlery, Crockery and Glassware

De-scales your home's Hot Water Service, Shower Heads, Dishwasher, etc

Reduced Energy, Repair and Maintenance Bills

Maintenance Free!

Runs on less than \$5 per year

Cleaner Clothes, Softer Hair, Healthier Water Environment

Domestic Applications

SOFT, HEALTHY WATER FOR YOUR HOME POOL & GARDEN

Installing **HYDROSMART** water treatment in your home is one of the best investments you can make towards protecting your appliances, improving your water quality and promoting the health of your family's water environment.

HYDROSMART'S unique ability to prevent and remove scale formation and reduce minerals to a tiny particle size, offers a range of benefits that no other water treatment can match, whilst simultaneously producing unlimited supplies of soft water.

kind to hair
shower and bath mildew goes
skin and clothes

The same **HYDROSMART** resonance frequencies that prevent and remove scale, also minimise corrosion. This significantly prolongs the life of your Washing Machine, Dishwasher, Hot Water Service, Steam Iron etc. Because no scale is forming on the elements, much less energy is needed to heat the water. This can save up to 25% on your electricity bills. Scale and large mineral crystals are responsible for the watermarks on bathroom and kitchen surfaces. They also show up as stains on glassware, cutlery and shower screens. These are all progressively removed along with the scale. It is the changing of large mineral crystals into tiny, invisible particles, that makes the water soft. This produces better lathering, excellent washing and rinsing results whilst both hair and clothing feel softer as the particles are so small that they easily rinse out of your hair and clothes. There is also a noticeable improvement in taste and water

clarity. Unlike conventional softeners, which require endless supplies of salt and add sodium deposits to our water supplies, **HYDROSMART** treatment is chemical free, which is better for our health and the environment. **HYDROSMART** treated water has now shown to have significant health benefits. The removal of scale and bio-film from kitchen and bathroom surfaces takes away the breeding ground for bacteria. It is now known that the tiny mineral particles are too small for algae or fungal formations to grow on. Shower mould soon disappears and taking with it the airborne spores that can trigger asthma attacks. There is also a significant reduction in fungal related skin problems such as dandruff and athlete's foot.

HYDROSMART removes algae from ponds and swimming pools and reduces the amount of chemicals required. It's great to swim in too!.

Two years of scientific research has proven that **HYDROSMART** treated water is beneficial to all aspects of plant growth and produces healthy plants from bore water with mineral levels normally considered toxic.
